QUADRI PER MANIGLIERIA
TORNERIA AUTOMATICA

CUSTOMIZED METALLIC SMALL ITEMS
SPINDLES FOR HANDLES
AUTOMATIC TURNERY

Azienda

PIZETA s.n.c. nasce nel 1970 come piccola azienda artigiana specializzata nella produzione di articoli in ferro per maniglie. L'azienda ha sede a Tavernole sul Mella in provincia di Brescia, nel distretto della Valtrompia, ai confini della Valsabbia; territorio storicamente legato alle produzioni metalliche e che vanta la presenza dell'80% delle maniglierie italiane.

Company

PIZETA s.n.c. was established in 1970 as small handicraft business specialized in the manufacture of iron products for handles. Company's headquarters are in Tavernole sul Mella, province of Brescia (Italy), Valtrompia district, close to Valsabbia, where 80% of Italian handle-manufacturers have their seat.

Prodotti

La produzione si divide in due rami principali:

ARTICOLI, PERNI E ACCESSORI PER MANIGLIERIA

MINUTERIA METALLICA SU DISEGNO

PIZETA si propone alla propria clientela con un'ampia gamma di articoli **a catalogo** e la possibilità di produrre una grande varietà di modelli personalizzati **su specifiche del cliente.**

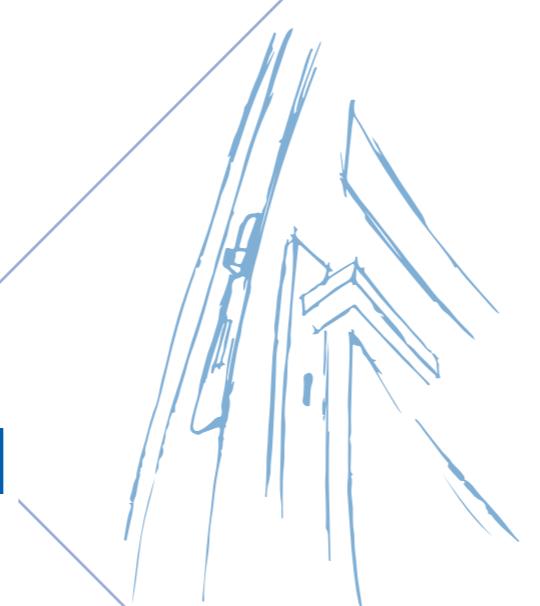

Products

Our product range is divided into two main branches:

ITEMS, SPINDLES AND ACCESSORIES FOR DOOR-HANDLES

CUSTOMIZED METALLIC SMALL ITEMS

PIZETA offers to its customers a wide range of **standard items** but it can also supply a large number of customized items, according to the **customers' requirements.**

Punti di forza

- > Know-how dal 1970
- > Sistema di gestione per la qualità certificato ISO 9001
- > Machine transfer CNC ad alta produttività e precisione
- > Costante aggiornamento tecnologico
- > Vasta gamma di materie prime
- > Consulenze gratuite

Strengths

- > Know-how since 1970
- > Quality Management System ISO 9001
- > CNC transfer machines
- > Constant investments in leading technology
- > Technological upgrade
- > Free consultancy

Processo produttivo

Grazie alla preparazione tecnica a tutti i livelli e al costante aggiornamento tecnico, PIZETA offre un processo produttivo certificato, ottenendo prodotti di qualità elevata a costi ottimizzati.

- > **Analisi richieste del cliente**
- > **Progetto esecutivo**
- > **Selezione materia prima**
- > **Lavorazione meccanica**
- > **Trattamento superficiale**
- > **Incisione**
- > **Controllo qualità**
- > **Imballaggio e spedizione**

Production process

Thanks to the technical training at all levels and the constant technological upgrade, PIZETA offers a certified production process, resulting in high quality products at optimized costs.

- > **Analysis of customer's requirements**
- > **Construction project**
- > **Raw material selection**
- > **Machining**
- > **Surface treatments**
- > **Markings**
- > **Quality control**
- > **Packaging and shipment**

Lavorazione meccanica

Il reparto meccanico dispone di numerosi macchinari transfer CNC, centri di lavoro, torni a controllo numerico, in grado di offrire **alta produttività e precisione**.

Machining

The mechanical department is equipped with several CNC transfer machines, workstations, numerical control lathes assuring **high productivity and precision**.

Tipologie di acciaio

- > **Acciaio 11SmnPb37 (AVP)**
Usato dal 99% della clientela,
secondo la norma UNI EN 10277-
3:2000 n. acciaio 1.0737 con Rm da
510÷810 N/mmq.
- > **Acciaio 11SmnPb30 (LED
108)** Secondo la norma UNI EN
10277-3:2000 n° acciaio 1.0718 con
caratteristiche simili al precedente
con un tenore % di S inferiore di
0,27-0,33%. Rm 510÷810 N/mmq.
- > **Acciaio 11Smn37
e 11SMn30 (AVZ)**
Secondo la norma UNI EN
10277-3:2000,n°acciaio 1.0736
e 1.0715 con caratteristiche
uguali alle precedenti ma privo
dell'elemento Pb. Rm 510÷810
N/mmq.

> **Acciaio 28SmnPb28 (PR60)**
Secondo la norma UNI EN 10277-
3:2000. Acciaio speciale prodotto in
base a nostre indicazioni per soddisfa-
re esigenze dei clienti che richiedono
una resistenza meccanica maggiore
rispetto alle precedenti qualità, questo
acciaio può raggiungere una Rm
630÷890 N/mmq. rappresenta una
via di mezzo tra 11SmnPb37 (AVP) e
35SMnPb14 (PR80).

> **Acciaio INOX Aisi 303**

Secondo la norma UNI EN 10088-
3:2004.n° acciaio 1.4305. Acciaio
che coniuga una buona lavorabilità
ad un'ottima inossidabilità,
impiegato in ambienti
particolarmente aggressivi
(vicinanze del mare, imbarcazioni,
industrie chimiche) Rm= 600÷890
N/mmq.

> **Acciaio 16MnCr5**

Secondo la norma UNI EN 10277-4:2000.
n° acciaio 1.7131. Tipico acciaio
da cementazione a tempra che
si impiega eccezionalmente
quando è necessario raggiungere
un'estrema durezza superficiale
anche superiore a 40 HRC
(conversione approssimativa
Rm=1300 N/mmq).

Grades of steel

- > **11SmnPb37 (AVP) Steel** It is used by
99% of our customers, in compliance with
UNI EN 10277-3:2000, steel no. 1.0737 with
Rm da 510÷810 N/sq mm.
- > **11SmnPb30 (LED 108) Steel** in
compliance with UNI EN 10277-3:2000, steel
no. 1.0718, with characteristics similar to the
previous steel and a lower content of S by
0.27-0.33%. Rm 510÷810 N/sq mm.
- > **11Smn37 e 11SMn30 (AVZ) Steel**
in compliance with UNI EN 10277-
3:2000, steel no. 1.0736 and 1.0715 with
characteristics identical to the previous steel
but without Pb. Rm 510÷810 N/sq mm.
- > **28SmnPb28 (PR60) Steel** in
compliance with UNI EN 10277-3:2000.
Special steel and produced according to our
specifications to meet the requirements of
the customers asking for higher mechanical
strength compared to the previous grades;
this steel can reach Rm 630÷890 N/sq
mm and its structure is halfway between
11SmnPb37 (AVP) and 35SMnPb14 (PR80).
- > **16MnCr5 Steel** according to UNI
EN 10277-4:2000 Steel no. 1.7131.
Typical casehardening steel to be used in
exceptional cases when extreme surface
hardness - also beyond 40 HRC - is required
(approximate conversion Rm = 1300 N/sq
mm).
- > **INOX Aisi 303 Steel** according to UNI
EN 10088-3:2004 Steel no. 1.4305. This steel
suitably combines good workability and
excellent resistance to corrosion, it is used in
particularly aggressive environments (close
to the sea, in boats, chemical industries) Rm
= 600÷890 N/sq mm.

Trattamenti superficiali

I nostri prodotti vengono trattati superficialmente tramite **zincatura elettrolitica** secondo norma **UNI EN ISO 2081**. Consiste in un rivestimento di zinco sulla superficie dei particolari in modo omogeneo, con l'obiettivo di elevare le proprietà della superficie, ottenendo un'elevata resistenza alla corrosione e all'usura. Tutto questo con un bassissimo impatto ambientale. Infatti i nostri prodotti sono **esenti da cromo esavalente**, sostanza classificata come cancerogena per l'uomo. Lo spessore dello zinco depositato sulla superficie può variare a seconda delle esigenze. Il nostro standard va dagli 8 ai 12 Micron.

Di seguito indichiamo le varie tipologie di colore e contenuti disponibili:

> Passivazione Bianca Standard

Permette di ottenere film di colorazione azzurra sul deposito di zinco elettrolitico ottenuto in ambiente alcalino o acido. Questo tipo di passivazione non contiene Cromo Esavalente.

> Passivazione Bianca ad alta resistenza

È una passivazione liquida a base di Cromo Trivalente, che permette di ottenere una buona finitura decorativa azzurra unita ad un'elevata resistenza alla corrosione di depositi di Zinco puro. Completamente esente da Cromo Esavalente e agenti ossidanti.

> Passivazione iridiscente (giallo paglierino)

È una soluzione passivante con finitura iridescente a base di Cromo trivalente, garantisce uno strato compatto e aderente anche per depositi di zinco ad elevata lucentezza.

Incisione

Tutti i nostri perni possono essere marcati con logo personalizzato o con le relative norme di riferimento. Possono esserci 2 soluzioni:

> Marcatura Laser

> Marcatura per Rullatura

Marcatura Laser
Laser marking

Marcatura per Rullatura
Marking by rolling

Markings

All our spindles can be marked with a customized logo or with the corresponding reference standards. We can offer you 2 solutions:

> Laser marking

> Marking by rolling

Surface treatments

All our products undergo a surface treatment by means of **electrolytic zinc plating** in conformity with the **standard UNI EN ISO 2081**. It consists of a homogeneous zinc layer on the surface of the items, in order to improve the characteristics of the surface and to obtain high resistance against corrosion and wear. All this assures an extremely low environmental impact. In fact, our products are free from hexavalent chromium, a substance which is considered carcinogenic for man. The thickness of the zinc which deposits on the surface can vary according to requirements. Our standard layer ranges between 8 and 12 microns. Hereunder you can find the different colours and treatments possible:

> Standard White Passivation

Thanks to this process you can get a light-blue layer on the electrolytic zinc deposit, which is obtained in an alkaline or acid environment. This kind of passivation does not contain Hexavalent Chromium.

> High-resistance White Passivation

This liquid passivation is based on Trivalent Chromium, which enables to obtain a fine decorative light-blue finishing besides high resistance against corrosion of pure Zinc. Completely free from Hexavalent Chromium and oxidising agents.

> Iridescent Passivation (straw yellow)

This passivation solution with iridescent finishing is based on Trivalent Chromium, it assures a compact and adherent layer also for high-brilliant zinc deposits.

Controllo qualità

La nostra azienda opera secondo procedure organizzative secondo la norma ISO 9001. Tutti i nostri prodotti vengono sottoposti a costanti controlli dimensionali in tutte le fasi del processo. PIZETA dispone di collaboratori dedicati all'assistenza per sviluppare un solido rapporto di collaborazione e soddisfazione reciproca all'insegna della qualità.

Quality control

*Our company operates according to organisation procedures in compliance with the standard ISO 9001. All our products are submitted to **constant dimensional checks in all process phases**.*

PIZETA is supported by collaborators providing assistance in order to develop a strong cooperation relationship granting satisfactory results at the sign of quality.

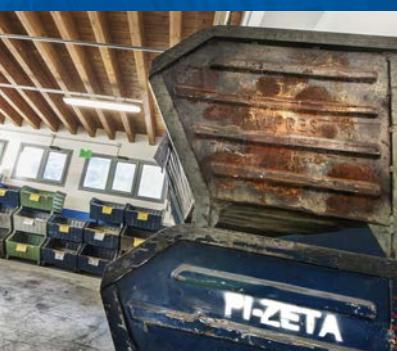

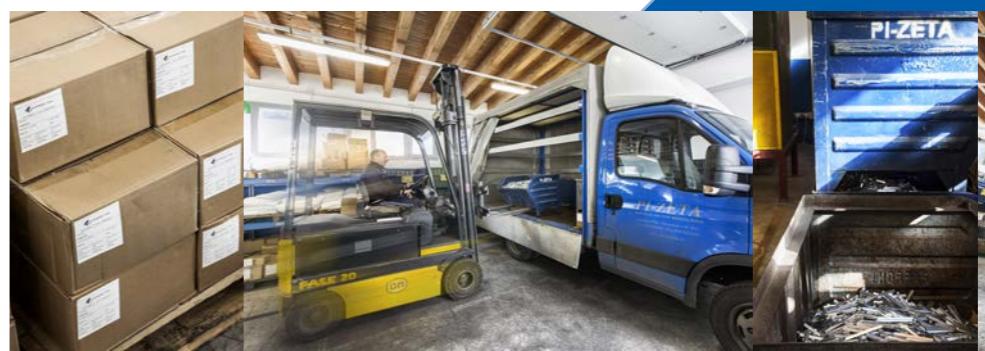

Imballaggio e spedizione

Il reparto spedizione controlla sistematicamente gli imballi, le etichette e la palletizzazione dei prodotti. Questi vengono forniti in scatole etichettate con indicazioni di peso, quantità, codice articolo e numero d'ordine. Su richiesta le scatole possono essere neutre.

Packaging and shipment

The shipping department systematically checks the packaging, the labels and products palletisation. These are supplied in labelled boxes stating the weight, the quantity, item and order numbers. Upon request, the boxes can be neutral.

Tolleranze Tolerances

Ove non specificato, i nostri articoli vengono prodotti in base alla norma UNI EN 22768-1 da cui si ricavano le seguenti tolleranze:

If no specification is given, our items are manufactured according to UNI EN 22768-1 standard, which prescribes the following tolerances:

| 0-6 mm | >6-30 mm | >30-120 mm | >120-400 mm |
|----------|----------|------------|-------------|
| ± 0,1 mm | ± 0,2 mm | ± 0,3 mm | ± 0,5 mm |

Tolleranze dimensionali nel quadro trafiletto
Dimensional tolerances for the drawn square spindle

| Quadro | h9 | h11 |
|--------------|------------|------------|
| da 3 a 6 mm | - 0,030 mm | - 0,075 mm |
| da 6 a 10 mm | - 0,036 mm | - 0,090 mm |

► Raggio 0,2 / Radius 0,2

► Raggio 0,6 / Radius 0,6

► Raggio 1 / Radius 1

Raggio del quadrato trafiletto

Alcuni dei nostri perni possono essere forniti con raggio sullo spigolo per non avere problemi con il montaggio sulla maniglia, viceversa alcuni perni sono a spigolo vivo per non avere gioco nella maniglia.
A sinistra alcuni esempi.

Radius of the drawn square spindle

Some of our spindles can be supplied with rounded edge in order to avoid any problem upon assembling; on the contrary, some spindles have a sharp edge, in order not to have any clearance in the handle. On the left some examples.

PF039B

Perno forato eccentrico 2 lati
Spindle with offset drilling on 2 sides

Lunghezza / Length
70 / 200 mm

Nella fase di assemblaggio il grano inciderà il materiale fino a perforare il quadro.
Upon assembly, the dowel cuts into the material until the spindle will be bored.

PF039A

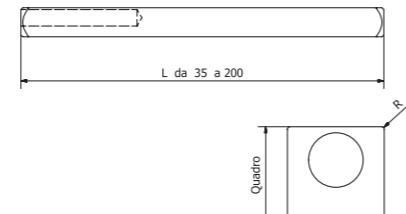

Perno forato eccentrico 1 lato
Spindle with offset drilling on 1 side

Lunghezza / Length
35 / 200 mm

Accessori per maniglie

Accessories for door-handles

KIT01

Kit plastificato composto da perno chiave più grano di fissaggio
Plasticized set consisting of wrench spindle plus fastening dowel

Dimensioni / Dimensions
 A richiesta / On request

KIT02

Kit composto da perno con riduzione
Spindle with reduction and fixed thread

Dimensioni / Dimensions
 A richiesta / On request

KIT03

Kit composto da viti per legno più grano fissaggio maniglia
Set consisting of wood screws plus handle fastening dowel

Dimensioni / Dimensions
 A richiesta / On request

PA055

Grani
Dowels

Dimensioni / Dimensions
 A richiesta / On request

PA057

Bussole
Sleeves

Dimensioni / Dimensions
 A richiesta / On request

PA061

Bussole di riduzione in acciaio e PVC
Reduction sleeves. Steel and PVC

Dimensioni / Dimensions
 A richiesta / On request

PA062

Viti con canaline
Screws with channel sections

Dimensioni / Dimensions
 A richiesta / On request

PA069

Rondelle varie di fissaggio
Various fastening washers

Dimensioni / Dimensions
 A richiesta / On request

PA080

Chiavette esagonale per serraggio grano su maniglia
Hexagon socket to tighten the dowel on the handle

Dimensioni / Dimensions
 A richiesta / On request

PF059

Niplex filettati interni
Niplex with internal thread

Dimensioni / Dimensions
 A richiesta / On request

PF066

Vite di assemblaggio per perni antipanik
Assembling screw for anti-panic spindles

Dimensioni / Dimensions
 A richiesta / On request

PF157

Bussola di riduzione in ottone
Brass reduction sleeve

Dimensioni / Dimensions
 A richiesta / On request

PF169

Perno con filetto interno per piastra di sicurezza
Spindle with internal thread for safety plate

Lunghezza / Length
 50 / 200 mm
